COURSE

Introduction to K Rend Modern Renders | Hand Application

LEARNING OUTCOMES

- Learn about the **K Rend** product range including base coats, general mortars, scraped texture renders and wet paste/thin coat renders
- Gain practical experience of how to apply modern renders by hand to deliver a high quality finish
- Understand best practice tips and techniques to apply renders including how best to use mesh and beads
- Understand substrate and installation processes that may affect the specification required
- Gain an understanding of how **K Rend** can benefit your business and help on the pathway to become a **K Rend Recommended Applicator**

BESPOKE OPTIONS

Courses can be focussed on bespoke modules (depending on the number of attendees and other attendee requirements), including;

- Dash renders
- Roughcast renders
- Brick rend
- Ashlar cutting or quoining

PRE-REQUISITE STANDARDS

Practical experience of using plasters/render materials.

WHAT YOU NEED TO BRING

Learners will be required to bring their own safety footwear for the practical elements of the course, all other PPE will be supplied. Lunch and refreshments will also be provided on the day.
